

Get Set For Higher Yields

At plant set, crops are at a stage of their greatest need of proteins for development and nutrients that counter-balance the external and internal stresses of development. Nutrients that enhance Nitrogen conversion and Amino Acids that increase microbial activity are especially important.

The Potassium component of *IQ Set* is critical for plants for water movement, energy production and the activation of enzymes that promote overall plant strength and productivity.

The combination of complexed and chelated ionic nutrients in *IQ Set* provides the optimum solution for strong and high-yield crops.

IQ Set - Superior Nutrients For Optimum Growth

Enhanced Crop Yield & Quality

Applied after plants have begun “setting,” the unique combination of essential nutrients, sugars and Amino Acids in *IQ Set* provides plants with the nutrition necessary for more consistent maturation and increased productivity.

Increased Microbial Activity

Only ionic, protected nutrients are truly plant-available, resisting soil tie-up. The complexing and chelation of *IQ Set* with Humic, Fulvic and Amino Acids assures high return with very low input rates.

True Plant-Available Nutrients

Insufficient levels of Amino Acids in alternative fertilizers means that much of the nutrients remain unprotected from soil tie-up. *IQ Set* contains 40% Amino Acids; enough to fully complex and chelate nutrients, to ensure nutrient protection and enhance plant uptake.

Simply Intelligent Growth

Amino Acids are the building blocks of proteins. Only *IQ Set* contains sufficient Amino Acids to fully Complex and chelate nutrients to provide superior conditions for increased foliar uptake, which leads to higher plant uptake or readily available nutrition this enables plants to reach their full production potential.

The addition of saccharides in *IQ Set* enhances the conversion of Nitrogen in plant metabolism, increasing plant growth, fruit set, efficiency and strength.

IQ Set - Benefits

- ✓ Enhances overall crop quality and yield
- ✓ Ultra-Low application rates
- ✓ The perfect blend of efficient Micronutrients, Potassium and Phosphorus for setting crops and eliminating deficiencies
- ✓ Enhances Nitrogen metabolism and protein development
- ✓ Promotes uniform maturity and production
- ✓ Enhances plant strength and resistance to drought and temperature extremes
- ✓ Clean, easy handling solution
- ✓ Will not corrode application equipment
- ✓ Low Impurities
- ✓ Highly soluble
